VINAWOOD

#1 PLYWOOD SUPPLIER IN VIETNAM

PRODUCT E-CATALOG

PRODUCTION PROCESS

01 VENEER DRYING
Veneer drying improves bonding quality and guarantees stable supply

02 PANEL LAY-UP
Veneer is glue-spread and laid up across grain to gain best strength

03 COLD PRESS
Cold press shapes plywood for ease of processing

04 HOT PRESS
Hot press cures WBP glue of plywood

05 SANDING & TRIMMING
After being sanded, plywood is trimmed into desired dimensions

06 FILMING
Plywood surface is coated with two phenolic layers to resist heat and liquid

07 EDGE TREATMENT
Plywood is quality marked and painted with waterproof paint

08 SHIPMENT
Products are packed with seaworthy packaging and ready to be shipped
