VINAWOOD

#1 PLYWOOD SUPPLIER IN VIETNAM

PRODUCT E-CATALOG

PRODUCTION PROCESS

01

VENEER DRYING

Veneer drying improves bonding quality and guarantees stable supply

02

PANEL LAY-UP

Veneer is glue-spread and laid up across grain to gain best strength

03

COLD PRESS

Cold press shapes plywood for ease of processing

04

HOT PRESS

Hot press cures WBP glue of plywood

05

SANDING & TRIMMING

After being sanded, plywood is trimmed into desired dimensions

06

FILMING

Plywood surface is coated with two phenolic layers to resist heat and liquid

07

EDGE TREATMENT

Plywood is quality marked and painted with waterproof paint

08
